Omni Channel Platform

Let's manage your business on solid bases

Omni Channel Platform

Our Omni-Channel Platform is a tailored solution that meets the needs of every customer with its look and features. It was created by professionals to professionals.

The platform and products fully comply with the rules and regulations of different jurisdictions. The platform supports registrations and management of player accounts in the system. The registration processes are always designed and configured according to the specific legislative requirements of a given region.

The module supports complete management of registration data. All forms are intuitive and organized. Access to player accounts is provided from several channels. An essential part of the platform is the registration and distribution of players' cards, both for loyalty and verification purposes. The platform is also available online and for betting shops. In addition, the betting shop solution is designed to work with shop players and allows them to gradually use the product via online and mobile channels.

- A fully customizable platform
- Combines traditional and online gaming into one complete solution
- Multilingual
- Leading products included in the platform
- Complies with rules and regulations of different jurisdictions
- Encourages player registration
- Increases loyalty
- A single wallet solution
- A single back-end solution for all products
- A 360° view of player's activity
- Can discover various patterns in large data sets, via so-called data mining

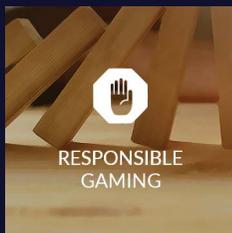

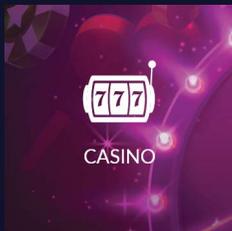

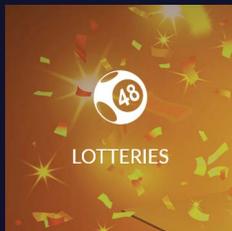

UNIQUE MIX OF ONLINE AND LAND-BASED

Our Omni-Channel Platform is a tailored solution that meets the needs of every customer with its look and features. It was created by professionals to professionals. The platform is configurable and multilingual in combination with the best products from leading suppliers.
