The SYNOT Group is an international, respected structure of companies operating in more than 20 countries worldwide and employing approximately 3,000 people. In terms of our business activities, individual companies operate in several sectors, particularly the gaming industry, IT technology, online solutions, security services, startup support sectors, real estate management and reconstruction, tourism-related investments and – last but not least – the sale of luxury vehicles (BMW).

Furthermore, the SYNOT Group has been a longtime supporter of the sport and non-profit sectors of the countries in which it operates. Through the SYNOT Foundation, it has supported thousands of projects beneficial to the public, distributing hundreds of millions of Czech crowns overall to concerns and entities in the areas of healthcare, social services, culture, sport, and education. Moreover, the foundation supports leisure activities; for example, it has developed a modern ski resort, a bike park, and other tourism activities.

At the same time, the SYNOT Group has undertaken sensitive renovations of several historic buildings and hotels owned by the group, both in the Czech Republic and in other countries, such as Slovakia. Several of these properties have even received various awards – the Secession-style Hotel Elizabeth in Slovakia has recently been named the best historical hotel in Europe by the Historic Hotels of Europe association. Many other significant investments are planned.

The top management of the parent companies in charge of strategic management and cross-functional business management is based in Cyprus. Highly qualified directors with long-term international business experience manage the entire group through the company WCV WORLD CAPITAL VENTURES CYPRUS LIMITED. They find and monitor international investment opportunities, coordinate investments of individual companies in countries around the world, and provide our affiliated companies with strategic, economic, and financial consulting.

WCV WORLD CAPITAL VENTURES CYPRUS LIMITED also drafts methodology and strategic plans for the development of its subsidiaries and provides consultations with regard to the promotion of new opportunities, the launch of new products, and entry to new foreign markets.

The dominant sector for the SYNOT Group companies in many global destinations is the gaming industry and the supply of state-of-the-art IT technology, software solutions, and gaming devices. In this sector, individual companies have top international know-how at their disposal, not only in terms of technology and business, but also in the area of legislation, finance, and marketing. At the same time, they cooperate with leading global suppliers. Individual companies of the SYNOT Group operate in the Czech Republic, Slovakia, Spain, Romania, Latvia, Macedonia, Vietnam, Tanzania, and many other countries of Europe, Africa, South America, and Asia, and expansions are planned to still more countries and continents.

Video lottery terminals are gaming systems consisting of a central control unit and an unlimited number of connected interactive video lottery terminals. The central control unit oversees all the gaming processes.
Video lottery terminals are the most progressive gaming systems on today's market, bringing more games and entertainment to customers than ever before.

Every video lottery terminal is connected into the central gaming system, which manages the game processes and ensures maximum security and transparency of all data.
